ACKNOWLEDGEMENT

Bushenyi District gratefully acknowledges the efforts of all the Stakeholders that contributed to the information and data collection for production of the District Statistical Abstract. It may not be possible to enumerate all those who gave their time but a few groups and individuals deserve special mention.

Special thanks go to Uganda Bureau of Statistics (UBOS) for their effort in Capacity Building and continued Technical Support to district staff to see to it that Bushenyi district gets specific data and statistics required for designing, planning, implementing, monitoring and evaluating development programmes. There are many documents that have been received by Bushenyi district from UBOS, such as reports of the Population and Housing Censuses, Uganda Demographic and Health Surveys and the National Service Delivery Surveys.

I wish to extend my appreciation to the District Technical Staff who were deeply involved in providing information for preparation of the Statistical Abstract and especially the District Planning department Team that coordinated the whole processes of preparing the District Statistical Abstract notably Mr. Bamusiime Dickson [Senior Planner], Ms. Tushemereirwe Oginia [Planner].

Impairment- *Any loss or abnormality of psychological or anatomical structure of a function.*

Infant- *A new-born baby who has not attained his/her first birthday as per the reference period.*

Infant Mortality rate- *The probability of a child born in a specific year or period, dying before reaching the age of one if subjected to age-specific mortality rates of that period, per 1000 live births.*

Intake Rate - *the proportion of children that are joining school for the first time to the total number of children in the official admission age.*

Late Starters Rate- *The proportion of new entrants in Grade One (at primary level) that are above the official admission age (over 6 years) to the total population of official admission age (6 years).*

Life Expectancy - An estimate of the average number of additional years a person is expected to live, if the age specific death rates for a given year prevailed for the rest of his or her life.

Literacy rate - This is the proportion of pupils/students aged 10 years and above who are able to read and write with understanding in any language expressed as a percentage of the total population in the country.

Literacy-The ability to write meaningfully and read with understanding in any language. A person who cannot write meaningfully and read with understanding in any language is considered illiterate.

Livelihood Analysis- A comprehensive assessment and interpretation of the way an individual, household or given community lives and survives.

Effectiveness: The extent to which planned activities are realised and planned results achieved.

Maternal Mortality Rate- The proportion of deaths of women that occur during pregnancy, child birth, within two months after the birth, or termination of the pregnancy for a specified period per 100,000 live births.

Measles Immunisation Coverage- The number of children below one year that receive the 1st dose of measles vaccines divided by the number of children below one year or expected births in the absence of true census of children below one year of age.

Morbidity - The frequency of disease, illness, injuries, and disabilities in a population.

Morbidity Incidence rate - Number of persons contracting a disease per 1,000 population at risk, for a given period of time.

Morbidity Prevalence Rate - Number of persons having a particular disease at a given point in time per 1,000 population at risk.

National Immunisation Rate - The percentage of children that have received a given vaccine. Immunisation covers children under one year and those between 12 to 23 months.

Neonatal Mortality rate- The probability of dying within the first month of life

Net Enrolment Ratio- This is the enrolment of the official age-group for a given level of education (Pre-primary, Primary, Secondary and Tertiary) expressed as a percentage of the corresponding population.

Older Person- A person aged 60 years and above. Previously, older persons were commonly referred to as “the Elderly”.

Orphan- A child whose biological parent or both parents are dead. Single orphans are children who have lost one biological parent, while double orphans are those who have lost both biological parents.

Out-Patient Department Utilisation Rate- The number of total OPD attendance (i.e. new attendance and re-attendance) per catchment population for the year in question expressed as a percentage.

Part-time Teacher - A person engaged in teaching for a limited number of hours per week in addition to other official responsibilities or engagements they may have.

Patient Bed Occupancy Rate- The number of patient bed days in a given period (e.g. quarter or year) divided by the product of number of beds in an institution and number of days in time period under review. It measures the extent to which in-patient facilities are being utilised.

Pedagogical Staff- These are non-teaching personnel, for example head teachers and school administrators, supervisors, school health personnel and librarians working in education institutions.

Pit latrine coverage - The percentage of households that have a functional pit latrine.

Population Density- Total population per square unit of area (sq Km).

Population Growth -The change in a given population or in one of its structural units within a given time interval. The components of change in total population are births, deaths and migration.

Post Neonatal Mortality rate- *The arithmetic difference between infant and neonatal mortality*

In Uganda the four levels of formal education include: pre-primary, primary, secondary, and tertiary.

Entry years at each level: i Pre-primary - 3 years; ii Primary- 6 years; iii Secondary – 13 years; iv Tertiary – 19 years

Pre-Primary Education Programmes at the initial stage of organised instruction designed to introduce young children, aged three years and above, to a school environment. Such programmes include; infant education, nursery education, pre-school education, or early childhood education.

Primary Education - *The first stage of compulsory education which provides pupils with basic literacy and numeracy principles, and a foundation in science, mathematics, geography, history and other social sciences.. It is preceded by pre-school or nursery education. The entry age for primary education usually varies between five and seven years. In Uganda this level covers seven years of elementary education.*

Pupil-Classroom Ratio- *The average number of pupils/students per class at a specific level of education in a given school-year.*

Pupil-Stance Ratio- *The number of pupils in the school divided by the total number of latrine stances in the school.*

Pupil-Teacher Ratio- *The average number of pupils (students) per teacher at a specific level of education in a given school-year.*

Pupil-Textbook Ratio -*The number of pupils using a single textbook.*

Repetition Rate - *This is the proportion of pupils/students from a cohort enrolled in a given grade at a given school-year who study in the same grade in the following school-year.*

Reproductive Health- *A complete physical, mental and social well-being in all matters relating to reproductive system and its functions and processes. WHO includes the term not limited to absence of disease at all stages of life.*

Retention Rate-*the proportion of learners that completed to the total number of learners who started the qualification, excluding transfers to other institutions. For programmes of study of two years or more, retention is calculated across the whole programme i.e. from the start to the end of the qualification.*

Rural population - *Total number of persons residing in rural areas or countryside areas that are not urbanised. Usually, most land in rural areas is utilised for agriculture.*

Secondary Education- *Educational level following primary school education. In Uganda, secondary level education (ordinary level) covers four years of general instruction at the initial stage, and two extra years of specialised instruction (advanced level).*

Sex - *The biological and physiological characteristics that define men and women. It is the differentiation of individuals, groups or an entire population of a country with reference to their reproductive functions.*

Sex Ratio - *The relative number of total males to females, usually expressed as a percentage.*

Teacher - *A person who provides education for pupils (children) and students (adults). In their respective professional capacities, teachers guide and direct learners in gaining knowledge, attitudes and skills whilst following a definite curriculum programme.*

Tertiary Education- *Educational level following the completion of secondary school education. Tertiary education also refers to third stage, third level, and post-secondary education.*

Tetanus Toxoid (TT) Coverage - *Number of TT1, TT2, TT3, TT4, and TT5 doses given to pregnant women expressed as a percentage of the number of expected pregnancies in the same period. The coverage of pregnant women attending Antenatal clinic with TT vaccine is an indicator of quality of care.*

Total Fertility Rate- *The average number of children who would be born to each woman in her reproductive age (15-49) following a particular Age Specific Fertility Rate (ASFR) at a particular period.*

Transition Rate -The proportion of pupils or students admitted into first grade of a higher education level in a given year to the total number of candidates who successfully completed the final grade of the lower level of education in the previous year.

Under-five Mortality rate - The probability of a child born in a specific year or period dying before reaching the age of five, if subjected to age-specific mortality rates of that period, per 1000 live births.

Universal Primary Education (UPE) - One of the Government of Uganda's main policy tools for achieving poverty reduction and human development by providing the facilities and resources to enable every child to enter and remain in school until the primary cycle of education is complete.

Urban population -Total number of persons residing in gazetted urban areas (such as City, Town and Municipal councils)

User Satisfaction with Health Services - The number of people surveyed expressing satisfaction with health services divided by the total population surveyed.

Vulnerability - A measure of the extent to which a community, individual, structure, service or geographic area is likely to be damaged, disrupted or impoverished, on account of its nature or location, by the impact of a particular disaster or hazard.

Youth - Any person aged between 18 and 30 years (As per the National Youth Council Statute 1993 of Uganda).

CHAPTER 1: BACKGROUND INFORMATION

1.0 Introduction

This chapter gives background information, location, size, climate, vegetation, geographical and other features about Bushenyi district.

1.1 Location and size

Bushenyi is one of the districts in the South Western Region of Uganda. The district lies between 0° N and 0° 46' S of the equator and 29° 41' East and 30°30' East of Greenwich. Temperature 12.5°C-30°C and Rainfall range 1500-2000mm. It is surrounded by the districts of Buhweju and Bunyaruguru in the North, Sheema in the East, Mitooma in the West and Sheema and Mitooma in the South. The largest town in the district, Ishaka, is located 75 kilometres (47 mi), by road, northwest of Mbarara. The coordinates of the district are: 00 32S, 30 11E. Bushenyi has a total area of 942 sq. km and is 910-2500 meters above sea level. Bushenyi district gets its name from the major town in the area, which is Bushenyi. Agriculture employs about 87% of the whole district's population.

1.2. Historical Background

Bushenyi District was created in 1974 out of Mbarara District. Bushenyi was the cradle of the UPC party in the western region. In 2009, it was split into five districts (four new districts of Buhweju, Mitooma, Sheema and Rubirizi districts) with one new municipal council of Bushenyi-Ishaka. Bushenyi has a total area of 942 sq. km and is 910-2500 meters above sea level and a population of 248,300 as of 2020 Population projections.

Economic activities

Bushenyi District is fairly endowed with natural resources. The district has relatively low poverty levels among its residents. The economy of the district depends mainly on agriculture. Agriculture is a source of food for the population, subsistence income for most families and provides direct employment to 86.7% of the district population, as well as supplying raw materials to industries. The majority of the people are involved in subsistence agriculture with some engaged in commercial production of crops including: Coffee, Tea, Sweet Bananas and Matooke. The major Economic activities include; semi intensive agriculture, fishing, trade and commerce, transport, stone quarrying, sand mining, mineral mining, construction industry, tourism and lumbering.

Ranching for beef and dairy farming for milk production are widely practiced on both subsistence and commercial scales in Bushenyi District. Hybrid cattle are widely raised on farms in the district. The hybrids produce more milk per animal and yield more beef per carcass and therefore are more profitable than the local breeds.

Soil degradation, poor marketing and processing systems, and frequent outbreak of crop and livestock diseases are some of the challenges that the farmers in the district face.

1.3 Tourism

Bushenyi District has a big potential for the tourism industry that includes among others the following: Queen Elizabeth National Park. About 5 percent of Queen Elizabeth National Park lies in Bushenyi district. Kalinzu Forest Reserve/Ecotourism center. Bunyaruguru Crater Lakes. Kyambura Wildlife Reserve. Crafts and Souvenirs Industry. Hotel and Catering.

Social services: Bushenyi has 36 private and government health centres and three privately owned hospitals. There are 127 government-aided primary schools and 56 private owned ones. The district has seven government-aided secondary schools and 31 private secondary schools.

1.4. Geographical Features

1.4.1 Topography

The eastern and central part of the district is a low-lying plateau with undulating hills. The rest of the district is hilly with sharp valleys and craters mainly in Kakanju, Kyabugimbi and Ruhumuro sub counties. This provides opportunity for tourism, tea growing and source of gravity water, it however possesses challenges in terms of road infrastructure and development thus making it hard for accessibility by vulnerable service providers

1.4.2 Climate, Rainfall, Temperature, Humidity and Winds

The district receives 1500-2000mm of rainfall annually and the mean annual temperature ranges from 12.5° C to 30° C. This climate is conducive and suitable for agricultural activities carried out in the district.

1.4.3 Soils

The district is endowed with loamy fertile soils with varying proportions of sand and clay. It has tropical rain forest vegetation of Kalinzu, Katsyoha-Kitomi and Imaramagambo; and savannah woodlands as well as semi- arid vegetation in the north and wetland vegetation.

1.4.4 Hydrology

Bushenyi District is endowed with rivers, streams & wetlands most of which flow in to river Rwizi, Edward and George. The wetlands are spread in all the Lower Local Governments. Major swamps in Bushenyi include: Nyamirembe, Nyaruzinga, Kandekye, Kyamugambira, Warugo and Katarimwa. The following hills in Bushenyi District act as the main sources of water/rivers and streams and they serve as water catchment areas. And they include: Ruhumuro Hills, Rutooma escapments, Kanyaruhara in Kyabugimbi , Buramba in Ishaka and Mpama in Nyabubare

1.4.5 Mineral Resources

Bushenyi District is endowed with minerals like; gold plus other base minerals. A number of companies intending to carry out mineral exploration have already expressed their interest through the Ministry responsible and the District. Other minerals available include; clay for brick making in various places in the District. Many more minerals are reported to exist including stone mining and sand quarrying.

CHAPTER 2: MANAGEMENT SUPPORT SERVICES

CHAPTER 3: DEMOGRAPHIC AND SOCIO-ECONOMIC CHARACTERISTICS

3.0 Introduction

This chapter presents information from the department of finance and planning. It focuses on the population and social-economic characteristics of the district, the planning & budgeting process, the available revenue sources, and the expenditures in the previous financial year.

The Finance department is one of the biggest departments in the District whose objectives are to;

- Identify and expand the revenue base:
- build Finance and Management Capacity at district level; and
- Strengthen Data Management systems, Revenue VRS and to influence demographic trends & patterns in a desirable direction.

3.1 Population Characteristics

To formulate present and future development programmes, the district needs to know the size, quality, distribution and growth of its population. Population censuses are the main sources of demographic data in general and information on population size, distribution and growth rate in particular. Other sources may include various surveys, Birth and Death Registration and Administrative Records.

3.1.2 Population Distribution

The distribution of a population by age and sex is among the basic types of information needed for planning. Sex and age composition of a population has significant implications for the reproductive potential, human resource, school attendance, family formation, health care and other service delivery in general.

The National Population and Housing Census was conducted in 2014 by UBOS and the provisional results were released. Accordingly, the table below provides population projections by T/C and sub-county for all the districts from 2015 to 2021. The projection results for this district are indicated in Table 3.2.

Further data processing and analysis is on-going to generate a more detailed report that will provide information on other indicators up-to the lowest level. Analysis of educational requirements, labour force projections, household composition and migration for example, would not be complete without considering information on age and sex.

3.1.3 Population Density

Population density refers to the number of people per square kilometre. Bushenyi district has an area of 905 sq.km. Therefore, the population density was 297 persons per sq.km of land in 2014. The population density increased from 258 persons per sq.km in the year 2002 to 297 persons per sq.km in the year 2014

3.1.4 Urbanisation rates and levels

Urbanisation is defined as the increase in the proportion of the population living in the urban area. However, the definition of urban areas has been changing over time. The 2002 and 2014 censuses defined urban areas as only the gazetted one while the earlier censuses included un gazetted urban centres with more than 1000 people as part of the urban population.

Table 3.6: Population Distribution by Rural – Urban and Sex as of 2020

3.1.5 Average Household size

A Household is defined as a group of people who normally eat and leave together. Household composition is a key variable for determining demographic characteristics of a population. Household size refers to the number of occupants of a household.

Table 3.8: Bushenyi Municipal Council Average household size by Division

Divisions	No. Households	Total	Av. HH size

3.2 Socio-Economic Characteristics

The socio-economic characteristic entails the well-being of the community. It includes the housing conditions, household assets, incomes and outstanding loans, household expenditure, welfare indicator and cultural participation of household members.

3.2.1 Housing conditions by type of house

Housing is one of the basic human needs that have a profound impact on the health, welfare, social attitude and economic productivity of the individual. It is also one of the best indications of the person's standard of living and his/her place in society.

This section provides information on the housing conditions of the population, household sanitation, assets and amenities available to the household and general household welfare.

3.2.2 Poverty distribution

Poverty has many different dimensions, ranging from material well-being (basic needs like nutrition, good health, shelter, education etc.) to lack of human rights, citizenship or social networks. Economic factors such as low income, lack of assets, access to markets or public services can lead into poverty.

Source: NPHC 2014

According to the 2002 National Population and Housing Census, 732 out of 48,050 households were using electricity for cooking which accounts for 1.5 percent. This also means that out of the 8,396 households in Bushenyi district that had access to electricity only 732 households could afford to use electricity for cooking which accounts for 1.5 percent. This therefore, requires government to reduce the cost of electricity so that many more people could afford electricity for cooking which provides clean energy. There is dire need for government, its development partners and the private sector to promote the use of electricity, Solar and gas for cooking. The proportion of the households using charcoal and firewood for cooking accounts for 94.6 percent which possess serious pressure on the wood biomass thus contributing to environmental degradation and other associated consequences including silting rivers, increased erosion, desertification and climate change in general.

3.3: Planning and Budgeting Process

The Finance department is one of the biggest departments in the District. Its objectives are to;

- Identify and expand the revenue base:
- Build Finance and Management Capacity at district level; and
- Strengthen Data Management systems, Revenue VRS and to influence demographic trends & patterns in a desirable direction.

CHAPTER 4: HEALTH SERVICES

4.0 Introduction

The Department of Health is headed by the District Health Officer whose mandate is guided by the District 5 Year Strategic Plan that focuses on the achievement of equity through increased access to Minimum Health Care Package (MHCP), Quality care, efficiency accountability and transparency. The overall goal of the sector is to provide good quality services to the people of this district so as to make them attain good standards of health in order to live a healthy and reproductive life. The sector objective is to reduce morbidity and mortality from the major causes of ill health and premature health and disparities therein". This district has 35 Health Units of different categories. Some of them are Government hospitals while others are owned by Non - Government Organizations. The distribution is fair, but some of them lack the basic equipment to offer reasonable services. Many rural units require rehabilitation and equipping. Besides diseases, poor nutrition has contributed to worrying situation. Because of cross cutting nature of health issues, there is need for an integrated approach to health.

There are various NGOs both Local and International that are involved in AIDS prevention and control in the district. Such activities include blood screening and counselling, medical treatment, home care, pastoral education, health education, AIDS research and orphan support.

4.1: Health Infrastructure

This section classifies the distribution of health facilities within the district.

CHAPTER 5: EDUCATION AND SPORTS

5.0 Introduction

The Department of Education is charged with overseeing the implementation of the district and National education policies and plans. It also monitors and evaluates the performance of the education system and school operations to keep required standards within the district. The areas of focus include teachers, pupils, school facilities and parents.

The Department also seeks to strengthen the institutional frame work for the management of schools and assurance of accountability of public resources in education programmes. The department is one of the best funded sectors in the district. The District Council equally joins the Government to promote education for all its citizens in partnership with parents and others members of the community. As such, the Government's Education policy is to promote quality basic education by improving access by girls and boys, equity and retention in all Primary schools and other levels of learning.

5.1 Educational Institutions

Educational institution is any institution whose sole or main purpose is the provision of education and such institution must be normally accredited or sanctioned by some public authority.

CHAPTER 6: WORKS AND TECHNICAL SERVICES

6.0 Introduction

The Works Sector comprises of two Departments (Roads and Technical Services and that of Rural Water and Sanitation). The sector further has to ensure proper quality in design, construction, inspection and maintenance of all Local Administration building structures. The national roads are developed and maintained by the Ministry of Works and Transport. The District Local Government maintains District Roads while Community access roads are the responsibility of the Lower Local Governments. This section presents selected statistics on work services delivery.

6.1 Roads

The District has a total of approximately **58.2** Km of trunk roads(Tarmac) and 15km of Trunk Roads(Murram), **392.3** km of District Feeder Roads,84.6km of Urban Roads (2-Town Councils) and **406.73** km of Community Access Roads. The District is in charge of maintaining the condition of District Feeder Roads whereas Sub-Counties maintain Community Access Roads.

6.1.1 Roads by grade, Length and condition

There are several categories of road networks including Trunk roads managed by the Central Government, Feeder roads managed by the District and Town councils, and community roads are maintained by community members.

CHAPTER 7: NATURAL RESOURCES

7.0 Introduction

The Department of Natural Resources comprises of the Natural Resources Office, the Lands and Physical Planning Office as well as the Forestry, Environment & Wetlands Office. It is charged with the responsibility of ensuring sustainable and productive utilisation of natural resources for poverty reduction, enhanced economic growth and improved livelihoods. The major causes of the deterioration the quality and the quantity of the natural resource base is associated with human activity. There is massive deforestation particularly on privately owned land where most of the districts tree resources are. This is closely followed by wetland degradation as a result of cultivation of crops. Other threats are soil erosion whose magnitude and impact has never been quantified.

Orphan hood status

In Uganda, an Orphan is defined as a child less than 18 years who has lost one or both parents. Parent's survival has a strong bearing on welfare of the children because children are dependent on their parent and other adult to support them.

CHAPTER 9: PRODUCTION AND MARKETING

9.0 Introduction

The sector is comprised of five sectors namely: Agriculture, Veterinary Services, Fisheries, Entomology as well as Trade and Industry. The department also ensures that appropriate institutional linkages are maintained with all relevant sector agencies; comprising mostly crop, livestock, fisheries, forestry and industrial research, marketing organisations, NGOs and CBOs engaged in agricultural activities

9.1 Agriculture

The term agriculture is used in a very broad sense to cover all the agricultural activities namely; crops, livestock, poultry, and fish farming.

Agriculture is the most common economic activity in the district. The majority of farmers are small holders who grow both perennial and annual crops. The perennial crops include Banana, Coffee, and Tea, while the annuals include maize, sweet potatoes, beans, cassava and groundnuts.

- Number of Households involved in Agriculture : 48200
- Ratio of Agriculture Extension workers to farmers : 1: 15900

9.1.1 Crop production

Both perennial and annual crops are grown in the district. The annual crops are mostly grown for home consumption.

2.2 Fisheries

Introduction

Fish farming is an activity in which farmers construct fish ponds usually on their holdings and introduce fish fries (young fish). Fish fries are commonly obtained from fish breeders like the Fisheries Research Institute (FRI) of the National Research Organization (NARO).

9.3 COMMERCIAL SERVICES

9.3.1 Industry

There is little industrial works in the district and even those operating have not fully registered and conformed to all the statutory requirements.

9.3.2 Trade

The district has very many trade ventures which are growing at a steady rate, however, most businesses are collapsing before celebrating their fifth birthday and this is majorly due to poor management practices like not keeping records, over trading, debtors and doing business as a leisure activity.

9.3.3 Savings and Credit Cooperatives Societies

Bushenyi has 87 Savings and credit cooperative Societies with clients ranging from 265 to 25,102 as at June 2020.

Performance across regions

The results for Uganda's four regions – central, eastern, northern, and western – are presented in the table above. Since 2009/10, poverty has fallen in all regions except the eastern region. The western and central regions have made remarkable progress and their poverty levels are below the national average.

The western region has experienced the largest decline in poverty over the last 20 years (44 percentage points) from 52.7 percent in 1992/93 to 8.7 percent in 2012/13. In the central, the proportion of people unable to meet their basic needs declined from 45.6 percent to 4.7 percent over the same period.

The eastern and northern regions continue to lag behind with poverty levels above the national average. Between 1992/93 and 2012/13, absolute poverty in the eastern region declined from 58.8 percent to 24.1 percent, but there was a slight increase of 0.2 percentage points in this region between 2009/10 and 2012/13, mainly due to an increase in rural poverty.

Although the northern region has significantly reduced its poverty level from 73.5 percent in 1992/93 to 43.7 percent in 2012/13, it remains more than twice the national average. The rapid reduction in poverty in the northern region is reflected particularly in rural areas.
